Special Structured Panels Balls

BALL CONSTRUCTION

HAND THERMAL HEAT

1 BLADDER

- Holds air and provides resiliency

2 LINING

- Maintains Shape and Durability (keeps ball round)

3 COVER

- Provides the feel, softness, and aesthetic appeal

Benefits from Thermal Heat Bonding Panel Technology:

- Reduced ball deformation, improved ball durability, and enhanced softness with great touch and feel.
- Seams between panels are formed like tire treads which drain out water without trapping or absorbing moisture under the panel and stitching holes.
- Ultra soft texture surface reduces abrasion on the cover material and gives it a more lively feel.
- Provides a consistent trajectory and true flight.

HAND STITCHED

1 BLADDER

- Holds air and provides

2 LINING

- Maintains Shape and Durability (keeps ball round)

3 COVER

- Provides the feel, softness, and aesthetic appeal

Benefits from Hand Stitched Panel Technology:

- Multi-ply twisted polyester cord is the material of choice in stitching together a soccer ball.
- Hand sewn balls have tighter and stronger seams. Reinforced polyester stitching is also used on some balls.

PROFESSIONAL SERIES SOCCER BALLS

Construction: High quality ball suitable for all surfaces. High frequency 32 panel construction, outer cover Japanese & Korean High Density PU material offers excellent form retention; durability and less water uptake. Ball improves the flight characteristics and also increases the shooting speed. Strong Cross Lamination backing of twisted polyesters fabrics provide enhanced stability. The Butyl bladder provide excellent air retention. Guarantees excellent level of performance.
Packaging: Each ball in a Poly Bag
Available Sizes: 5, 4 & 3

VOLLEY BALLS SERIES

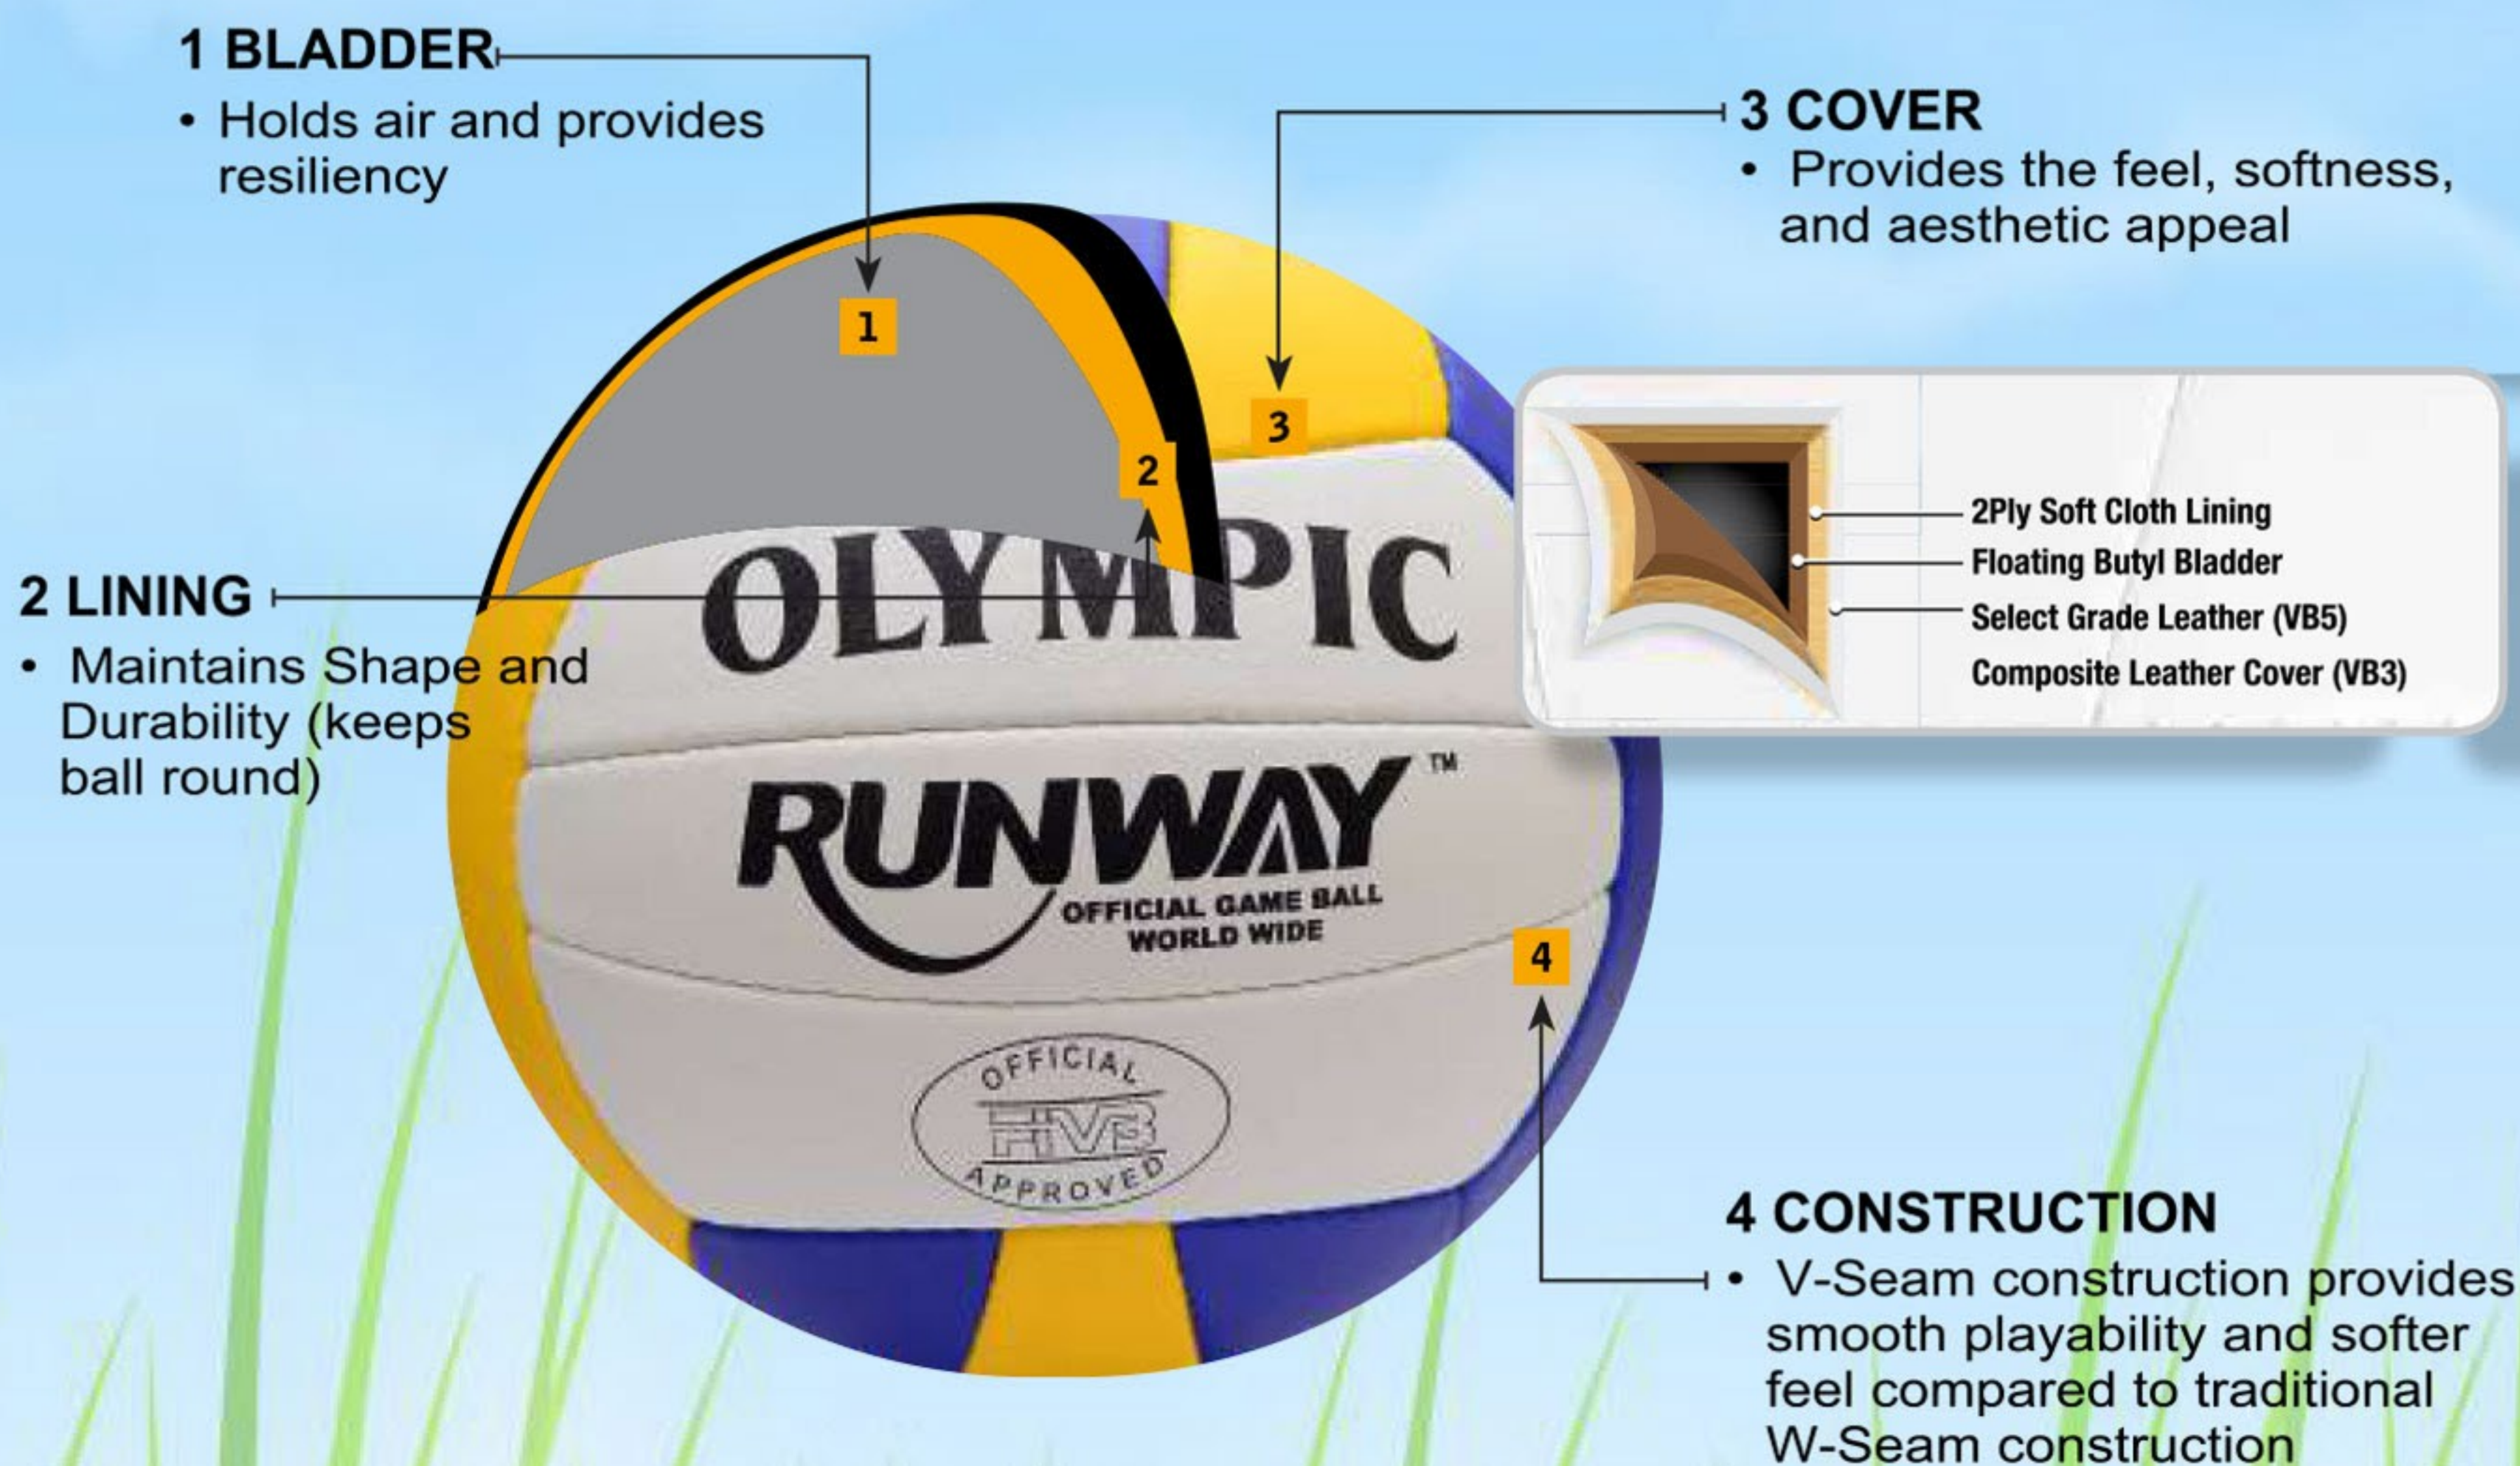

Technology of MVA200

DOUBLE DIMPLE

To minimize the air resistance, we have put the multipat-
terned 2 different types of dimples, DIMPLES and MICRO
DIMPLES on the surface of the ball. Consequently, when
players spike the ball, it will fly more stable. Furthermore this
DOUBLE DIMPLE construction creates the powerful grip
feeling, expanding the contact ball surface area to players'
hand dramatically. By the special nano-technology coating
process on the ball surface, when the ball is wet by sweat, it
becomes less slippery, and increases the grip feeling.

ABOUT YOUR GLOVES

TYPES OF CUT

FLAT CUT

This is the classic cut. As its name indicates, the glove structure and palm are flat. The latex from the palm is connected to the backhand by textile or other light material.

ERGONOMIC CUT

This cut provides unmatched comfort by simulating the natural position of your hand while resting.

ROLLFINGER CUT /

The latex wraps around each finger almost completely, providing you more grip area. It's a really tight cut, exerts a little pressure but still feels comfortable. One of the most popular among Worldwide goalkeepers.

NEGATIVE CUT

This cut has seams inside the glove. It loses some latex surface but you feel it really tight on your hand. This is a very technical cut and since it is so tight you have great control when contacting the ball.

NEGATIVE-ROLL CUT

The latex wraps around almost entirely most of the fingers and connects with the front by inner seams to give you better fit. It has been specially designed for those looking for maximum contact feeling.

ERGO-ROLL CUT

Maybe say combines the best of two cuts, the Ergonomic and Rollfinger providing both comfort and natural catch-ready position while also giving maximum surface area for optimum grip and security.

Features/Cuts/ Protection Use in Gloves

LATEX

Hypersoft Latex

- natural foam, 3.5 mm thickness
- outstanding grip characteristics of the international top category
- international accepted pro match foam
- superior cushion technology

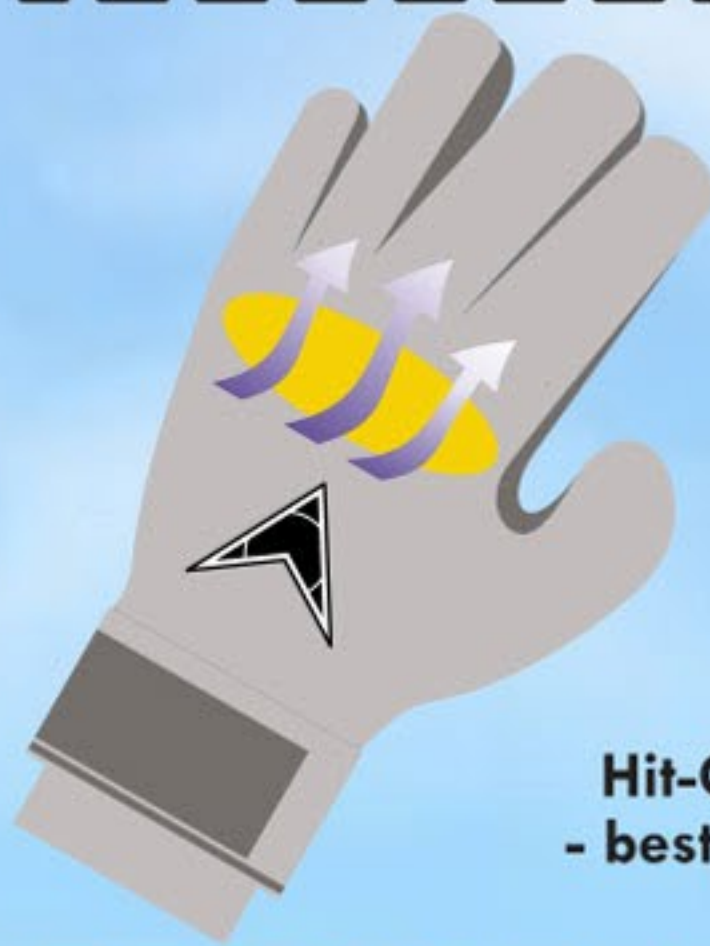

Supersoft Latex

- natural foam, 3.5 mm thickness
- entry level category for professional use
- excellent grip
- high volume foam

Soft Latex

- natural foam, 2.5 mm / 3.0 mm thickness
- smooth
- very good abrasion resistance
- best for training and matches

FEATURES

Hit-Control
- best control for hitting

Flexi-Cut
- comfortable & flexible fit
- tearing control

Outer Wrap
- excellent grip at palm
- best fitting

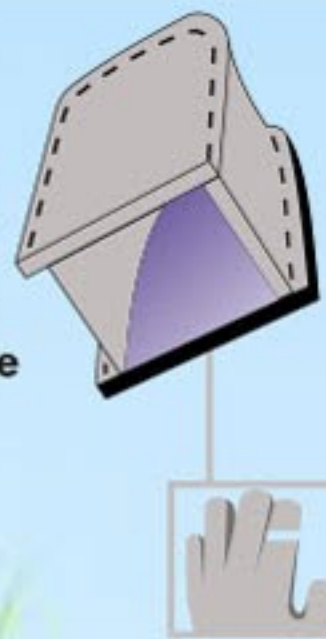

Best Abrasion
- critical areas are best abrasion controlled

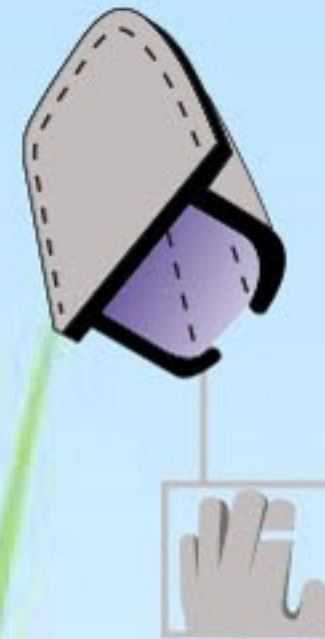

Flexi-Zones
- comfortable & flexible fit
- auto-wearing

CUTS

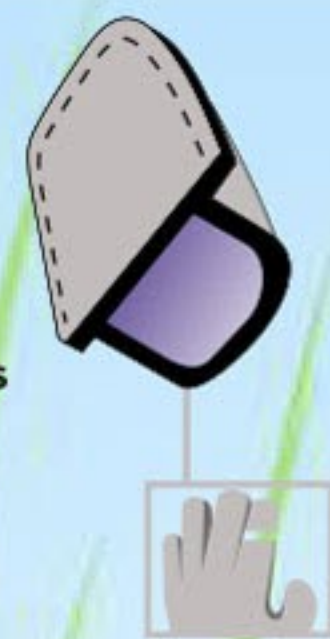

- Traditional Cut**
- traditional & classic cut
 - most popular
 - finger gussets made from fabric and stitched positive
 - Wide Fitting

- Negative Cut**
- finger gussets made of latex and stitched negative
 - tight fitting
 - popular among the professional

- Rolled Fingers**
- no finger gussets (palm latex wrapped around the fingers)
 - tight fitting without seams
 - popular among the professional

SHIN GUARD SERIES

SHIN GUARD SERIES

PRODUCT DESCRIPTION

Soccer Shin Guards - Youth Sizes - by FavorGear

Designed for YOUTH Soccer Player Protection for Training or Match Use.

PRODUCT BENEFITS

- Features an Ankle Sleeve to provide added protection to kids.
- PP shield combined with cushioning Polyethylene foam padding help to provide shock absorption.
- Ankle protection and elastic strap and for holding the shin guard in position.
- Separable Ankle Sleeve Design makes it easy to put on and take off, and each part can use individually.

Comprehensive Protection
and Comfort

Designed with safety and mobility in mind.

SHIN GUARDS

Series

Construction: Shin Guards with Ankle conditions. The construction of Front & Back PU with EVA Cup give protection to the players and avoid injury

INSTRUCTIONS FOR USE & SPECIFICATIONS

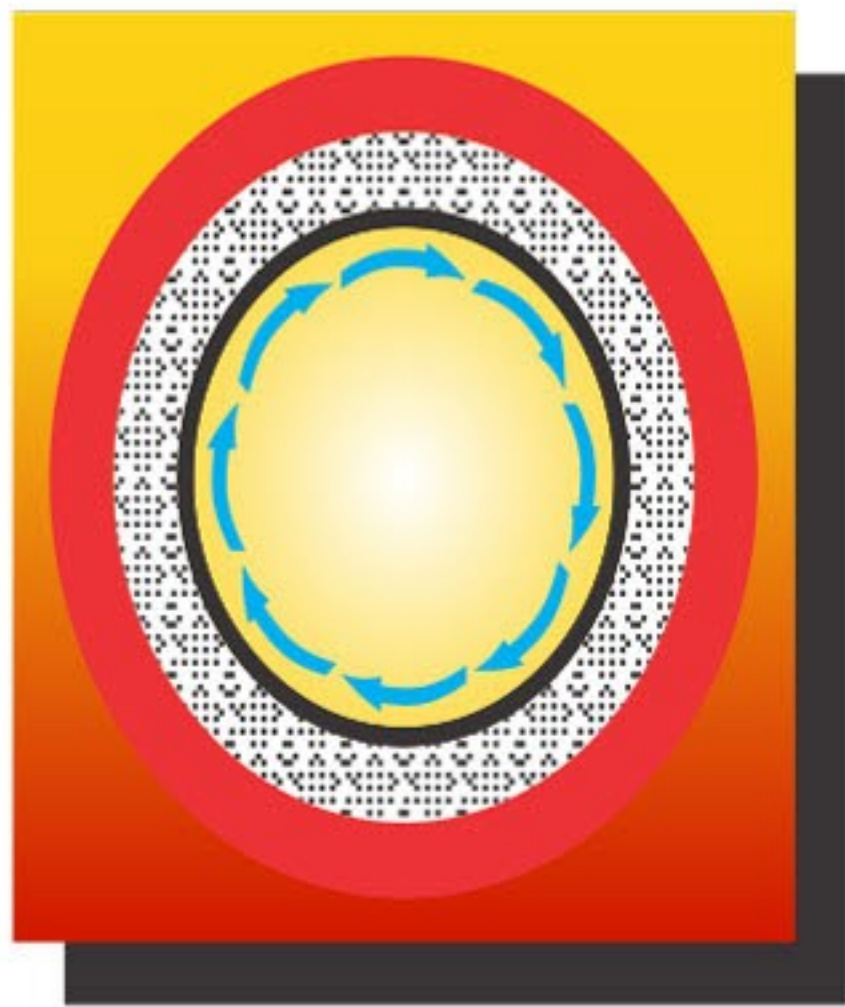

Before inflating unfold the ball with both hands so that the ball becomes softer.

To inflate the ball, apply a drop of silicone oil into the valve.

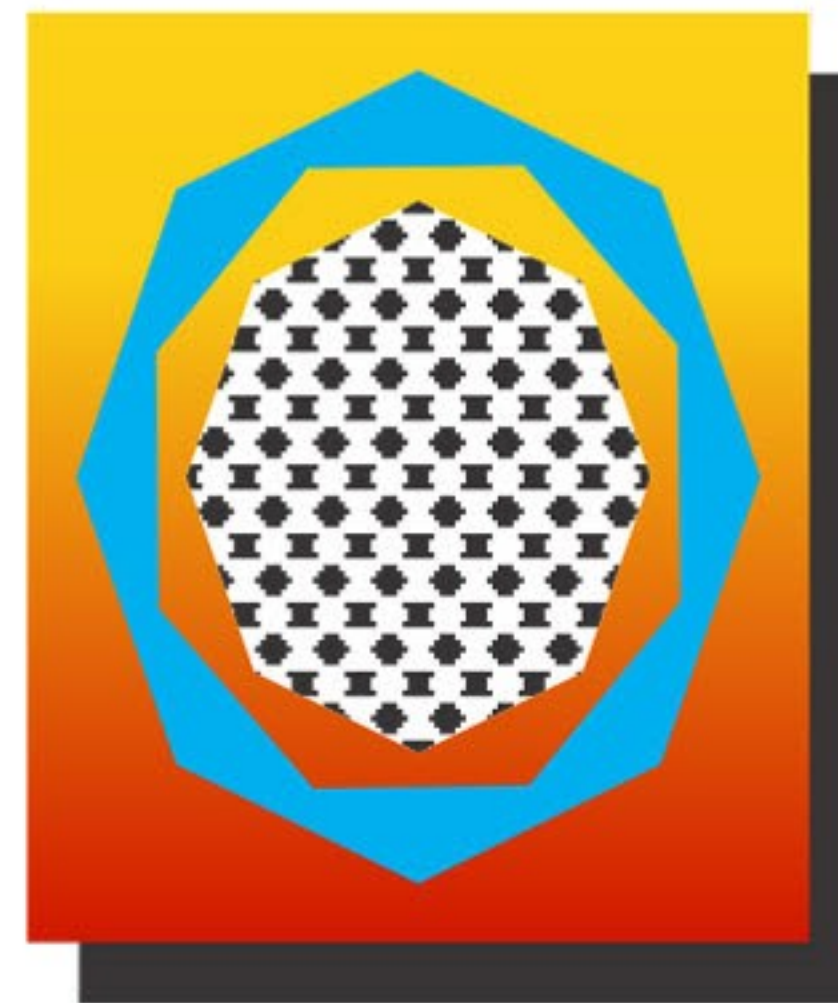

Do not put pressure on the ball with pump to avoid damage to the bladder

Accurate balance bounce on all fields.

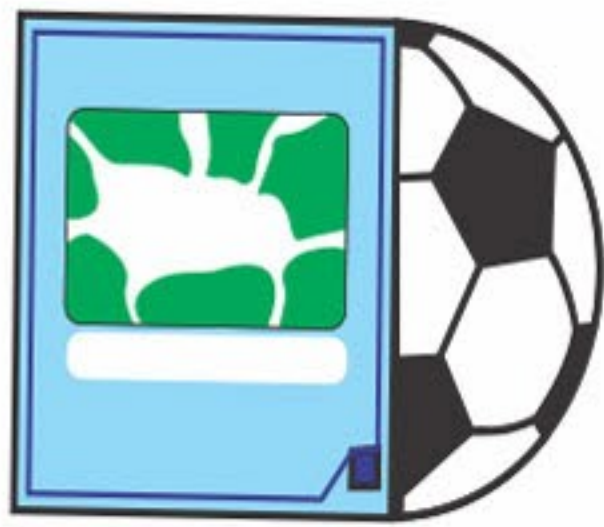

After inflation of ball remains equal in shape.

Perfect balance panel for more equalization of perfection in the ball.

For high speed & excellent air crossing flexibility.

FUNGUS FREE

We ensure the inclusive of **ANTI** fungus germicides in manufacturing, ensuring fungus/mould **FREE** balls.

NOZZLES & BLADDER

- (1) Specially improved butyl valve to minimize slow leakage 80% as compared to ordinary bladder.
- (2) Extra strong adhesives glue ensures permanent sticking of bladder to the inner shell for an everlasting grip

LEAKAGE FREE

24 Hours leakage test before insertion to the shell.
24 Hours air retention test after encavement in the shell.

LEAD FREE INKS

Cosmetics designs is carried out in lead free inks ensuring maximum safety as these do not contain any hazardous ingredient for health.

Our hand sewn sports balls are manufactured with out Child Labour
